GRIEVANCE REDRESSAL:

1. Purpose

Apar employees are a diverse group whose personalities, experience, abilities, and personal goals vary widely. Because of this, employees may, at times, have a grievance concerning hiring, termination, promotion procedures, problems in the workplace, dissatisfaction with the implementation of policies etc. The company encourages employees to communicate their grievances. That way we can foster a supportive and pleasant workplace for everyone.

2. Scope

This policy applies to all employees of the company irrespective of their grades & levels.

3. Definition

Grievance is any complaint, problem, concern or dissatisfaction of an employee regarding their workplace, job or coworker relationships.

4. Grievance Redressal:

Any employee who believes that he/she has been treated unfairly or who has experienced or observed an incident of illegal or inappropriate conduct should report his / her grievance as soon as possible, by following the steps in this policy. Because every situation is different, this policy will be applied flexibly.

Step I:

Talk to the person you have the problem with; in many cases, just having an open communication can help you to solve the differences with another employee. However, if this doesn't work or you don't feel comfortable talking to the other person, you can skip this step and move to step 2.

Step II:

Talk to your Supervisor / Manager. In many cases, the Manager will be the best person to resolve problems that an employee experiences or observes. Therefore, employees are encouraged to inform their Supervisor/Manager about any incidents of unfair, illegal, or inappropriate conduct or conditions.

In some situations, it may be inappropriate to report a problem to a Manager. In these instances, or if the discussion with the Manager does not produce a satisfactory result, employees are encouraged to discuss the conduct informally with Managers at next level or with the HR Team.

Step III:

If discussions in Step 1 and / or Step 2 do not produce a satisfactory result, or if for any reason employees feel uncomfortable reporting the matter in an informal face-to-face setting, they should file the Grievance with the Grievance Committee (GC) through following means

1. Email the details of the grievance at somya.shukla@connexrm.com
2. Drop an incident report in the Suggestion box, along with your contact details
3. Drop an anonymous incident report in the suggestion box

Commented [SS1]: Should we continue to have a suggestion box? Rekhansh's view – No .

On receiving the Grievance, the GC will evaluate and begin thorough investigation on the issue. This may require the employee (if the details have not been kept anonymous) to have an open discussion with the Panel members and/or provide further information or documentation.

The GC will come back with an appropriate resolution within 5 – 10 business days.

Step IV:

If the issue is not resolved in the given time line or the employee is not satisfied with the solution provided by the GC, they should file the grievance to the Senior VP -HR and Operations at Sanyukta.vohra@apar.com

This is the highest level of escalation & decision made at this level will be final. Details of the employee will be kept strictly confidential at this level.

Senior VP -HR and Operations	
Sanyukta Vohra	Sanyukta.vohra@apar.com

Please note all team members included in this process of any grievance redressal will ensure the details of the grievance are kept confidential.

ESCALATION MATRIX:

An Escalation is a procedure that results from the pre-established set of parameters that moves an employee's complaint, challenge or concern to either a more senior representative or one that initiates a related process.

Apar's escalation matrix outlines who should be notified when an incident/issue occurs, whom it should escalate to if the first responder isn't available, who should take over if or when the responder can't resolve the issue on their own, and how those handoffs should happen.

Infrastructure/System related Incident Escalation –

IT or system related escalation is when an incident is related to office infrastructure or IT System.

Level 1	Bikas Pradhan
Level 2	Jagdish P

Functional escalation –

Functional Escalation is when the incident/issue is related to your department/project or line of work.

Level 1	Team Lead-Line Manager
Level 2	Ashish A
Level 3	Amit G

HR Issue Escalation –

This is when the incident/issue is related to HR matters like leave policy, medical insurance, Salary and other related queries.

Level 1	Somya Shukla
Level 2	Sanyukta Vohra

Admin Issue Escalation

Level 1	Sanjeev Kumar
Level 2	Somya Shukla
Level 3	Sanyukta Vohra

Please note the escalation Matrix only serves as a guideline and it is not a hard and fast set of rules.

Apar promotes an open office environment therefore, if you think a specific case calls for a different escalation strategy, we give you the freedom to make that judgement call. The intension here isn't to create inflexible rules, but to create guidelines that apply in most situations.
